tc.divyashree.netlify.app (PORTFOLIO) | github.com/divyashree29 (GITHUB) | BENGALURU, INDIA

Objective

Experienced Backend Engineer with 2+ years of proficiency in developing high-performance Microservices using Java, Rest APIs, and the Spring Ecosystem (Spring Boot, Security, Data). Expert in securing enterprise applications via OAuth 2.0 and optimizing backend latency. Adept at working in Agile environments, utilizing Docker for containerization and AWS for cloud deployment to solve complex, large-scale business challenges. Seeking a development-focused role to build high-impact, user-centric software products.

Work Experience

LG Soft India (LGSi) | Software Engineer

July 2024 – March 2026

- Engineered 6+ core Microservices using Java and Spring Boot, decoupling complex business logic into scalable Data Collection and user task modules.
- Implemented asynchronous communication via Apache Kafka, enabling real-time credit updates and reducing system latency by ~40%.
- Configured Spring Cloud Gateway as an Edge Server to centralize request routing and abstract microservice complexity.
- Developed RESTful APIs secured with OAuth 2.0 and JWT, ensuring robust authentication and authorization for internal users.
- Designed and optimized MySQL relational schemas to manage high volumes of records and secure audit logs.
- Managed CI/CD pipelines using Jenkins and Docker, automating the deployment of containerized services by ~60%.
- Utilized Splunk and Log4j2 for real-time observability while collaborating in an Agile environment to deliver features.

Ahana system and software Pvt Ltd | Data Analyst Intern

February 2024 – April 2024

- Gained understanding of the end-to-end data analysis workflow, including data collection, cleaning, and transformation into business insights.
- Developed foundational knowledge of data interpretation and visualization techniques to support decision-making.
- Built awareness of ML model evaluation and how models are assessed for performance within the ML lifecycle.

Technical Skills

- Language & Backend:** Java, Spring Boot, RESTful APIs, Spring Security (JWT), Spring Data JPA, Microservices
- Data & Messaging:** MySQL (Schema Design, Normalization, Indexing, Query Optimization), Apache Kafka
- Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes, CI/CD, GitHub
- Testing:** JUnit, Mockito
- Developer Tools:** Maven, Swagger Hub, Cursor, Tabnine, Postman, Git, GitHub Copilot
- Core Concepts:** OOP, DSA, System Design (LLD/HLD), Generative AI
- Agile/Scrum:** Experience with Agile development methodologies

Projects

Payment gateway Application ([Link](#))

Spring Boot, MySQL, OAuth 2.0, Docker, CI/CD, GitHub, AWS

April 2026

- Engineered a scalable payment gateway simulator using Spring Boot to replicate real-world transaction flows, enabling safe testing without external dependencies.
- Implemented secure REST APIs with OAuth 2.0 for authentication and authorization, simulating production-grade payment security mechanisms.
- Developed and optimized relational schemas in MySQL and containerized services using Docker, ensuring data consistency and environment portability.
- Automated CI/CD pipelines and deployed on Amazon Web Services, delivering a reliable, end-to-end system capable of simulating success, failure, and refund scenarios for payment integrations.

AI-Powered Pdf Interaction Bot ([Link](#))

A Generative AI Project – Machine Learning

Oct 2024

- Created a generative AI chatbot that utilized libraries including Streamlit, Langchain, and FAISS. Enabled PDF uploads, text extraction, and real-time conversations.
- Employed Google Palm-2 embeddings for language understanding (Large Language Model).
- Incorporated conversation history for context-aware responses, improving user interactions

Publications and Certifications

- Published research paper "Digital Notice Board using Wi-Fi Module" at IEEE-MRTM Conference (Sept 2023), demonstrating expertise in IoT and embedded systems
- REST API Integration and Controllers – JP Morgan Chase & Co
- Introduction to Generative AI - Google cloud

Education

New Horizon College of Engineering, Bengaluru

2020-2024

- B.E in Electronics and Communication Engineering | CGPA- 8.9
